

**Job Position:** Field Engineer

### **Position Overview**

Park Construction Company, a regional Highway/Heavy contractor established in Minneapolis, is searching for an experienced Field Engineer. The right person will demonstrate a high safety standard, leadership skills, and ability to work in a team environment.

Park works throughout the Midwest with a large portion of work in North Dakota. Travel to these projects will be required. Excellent salary, benefit package, and promotion opportunities available to qualified candidate.

### **Requirements**

- Experience: Field Engineer experience in the highway, street and bridge construction industry
- Knowledge: Generally-accepted construction methods for this industry
- Education: Bachelors degree in Engineering or Construction Management
- Ability to:
  - Provide technical guidance to the project
  - Conduct inspection of the field work, perform walk downs, develop punch lists, mark up drawings to reflect as-built conditions
  - Review shop drawings for conformance with the contract
  - Report accurate quantities for labor cost reports
  - Support Project Superintendent by enforcing quality control
  - Ensure construction work complies with all engineering standards, codes, specifications, and design instruction

NOTE: This job description is not intended to be all-inclusive. Employee may perform other related duties as negotiated to meet the ongoing needs of the organization.
